>80	Male	Yes	350	10	2.857%

NOTE: In order to enroll in the C8 Health Project, potential participants needed to travel to one of the established community-based screening sites. It was beyond the scope of the C8 Health Project to recruit and screen participants living in group residential facilities, such as nursing homes. Therefore, as participants in the C8 Health Project did not include those individuals more at risk for having Alzheimer's (those living in nursing homes), the self-reported prevalence of Alzheimer's Disease may be lower than expected in a population of this size.

SELF-REPORTED DIAGNOSIS OF ALZHEIMERS IN FEMALES
STRATIFIED BY AGE GROUP

Age Group	No	Yes
0-10	100% / 2690	0.0% / 0
11-20	100% / 4770	0.0% / 0
